

BONETTI - SHOWERS AND OSCILLATORS

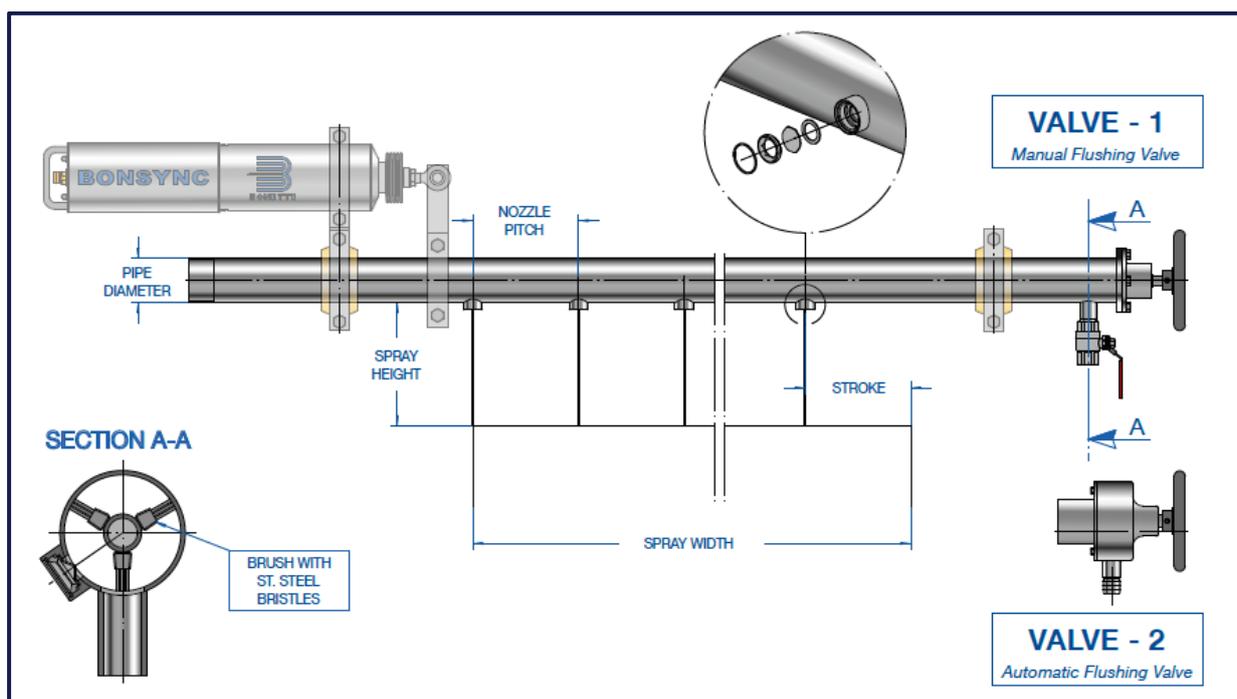

Art. Nr 1/2021

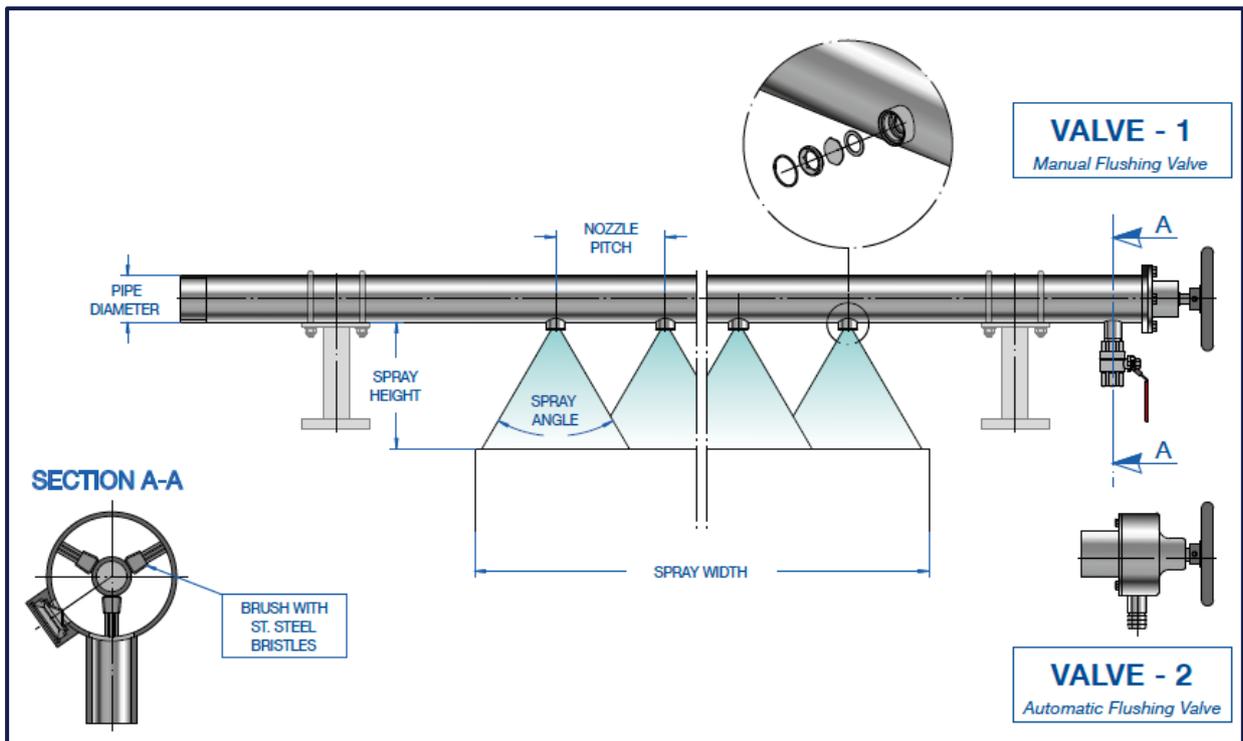

BONETTI – is a company we have been working with for many years. Established in 1923 Bonetti has been successfully supplying the pulp and paper industry with scraper blades, holders and complete scraper systems since more than 50 years. Challenged by ever-changing doctoring technology, Bonetti has then successfully developed “hi-tech” materials and solutions.

NEW SHOWERS

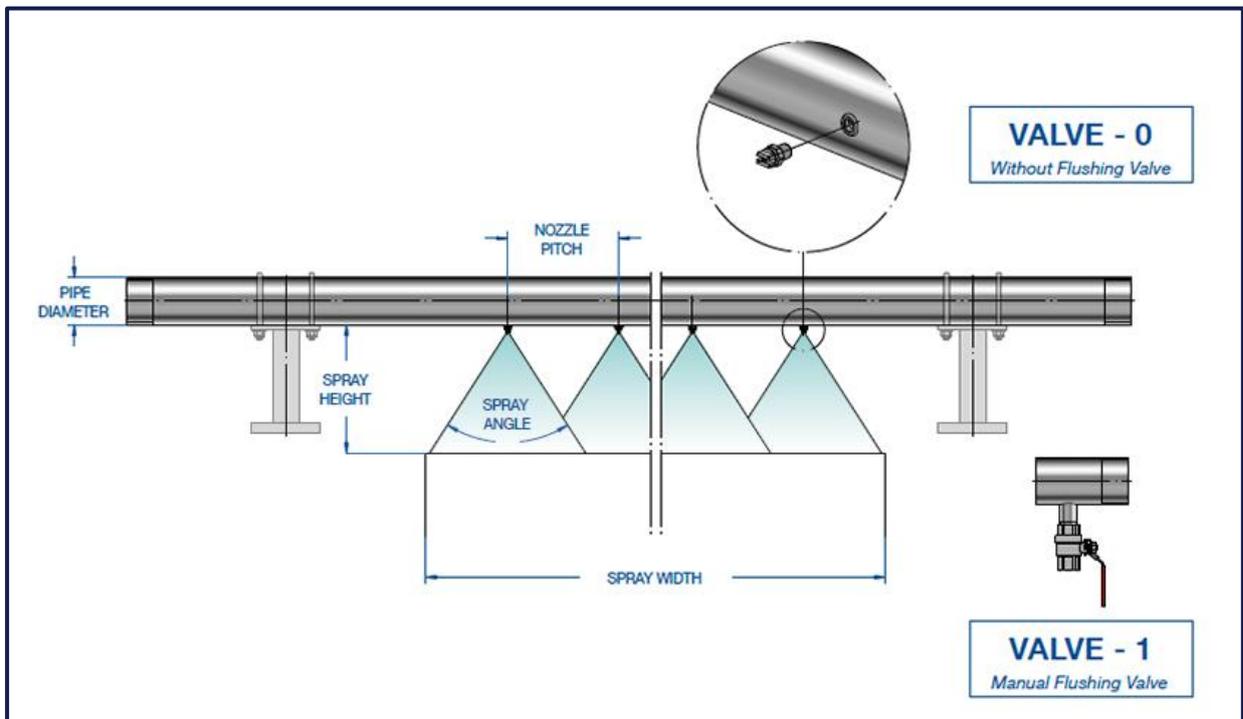

We are pleased to announce that our partner has just expanded its range with a new series of products. A complete range of **high and low spray showers for pulp and paper industry**. A key component of these products is newly developed BonSync electronic linear drive.

BonSync - NEW OSCILLATOR

BonSync guarantees streak-free conditioning of the wires and felts. It allows a low feed rate to be set, allowing the use of smaller nozzles diameter to minimize water and energy consumption. In addition, BonSync has an electronic control panel that allows it to be precisely synchronized with the speed signal of the paper machine, ensuring a perfect cleaning at all machines speeds.

Specification:

- Operating Voltage: 110–230V 50–60Hz
- Power consumption: 200W
- Oscillator operating temperature: 0-75°C
- Control unit operating temperature: 0–55°C
- Oscillating speed: 0,01-4mm/s
- Oscillating stroke: 1-250mm
- Thrust: max 5.500N
